

A REVERENCE FOR WOOD

by Teresa Bell

There is a special appreciation for the unique qualities of wood among those of our craft. One cannot fashion a piece of wood into fine cabinetry, furniture, or paneling without developing an admiration for the unique pattern of the grain, the rich color revealed through the finishing process, and the singular expression that the character of each piece of wood lends to the project.

As he ran a worn hand over the smooth surface of his latest undertaking, one old woodworker aptly described it as a “reverence for wood.”

Accordingly, we also place high value on this precious natural resource and are committed to the responsible management of that resource.

We encourage the use of wood that is sourced from under-utilized species as part of the solution, as well as the use of recycled and low-VOC products.

We support the use of responsible forest management practices to conserve this valuable resource for the future.
