Product to be acknowledged

Hardware:

- Drawer Slides Extension: _____ Weight: _____
 Hinges Degree: _____
 Locks Shelf Rests Pulls Catches
 Base Adjusters Pocket Door Hardware Sliding Door Tracks

Sheet Products:

- Panel (High Density Overlay, Hardboard, Particle Board, Medium Density Fiberboard)
 Laminate (High Pressure, Continuous Pressure, Compact or Thermally Fused)
 Veneer
 Solid Surface

Product Description: _____

Applicant must submit a physical sample, sales and technical literature for all products. Please submit all required documents to acknowledgedproducts@woodinst.com and mail physical samples to our office address. The office will verify when all items have been received and will provide updates on the approval process.

Independent Testing is required for Hinges and Drawer Slides and **MUST BE INCLUDED** with this application. As per NAAWS Section 10, Casework, Subsections 10.5.1 through 10.5.1.2, 10.5.1.5 and 10.5.1.8 testing requires that:

- Hardware will conform to ANSI/BHMA Standards, minimum grade 2 requirements except for requiring “dynamic” load testing for a minimum of 50,000 cycles
- Hinges will be a minimum of 110 degrees opening capacity meeting ANSI/BHMA 156.9 and if being used in schools, hospitals or laboratories shall be tested to Grade 1 requirements.
- Drawer Slide Testing will be based on a drawer slide nominal length of 22” (559mm) mounted on drawer box:
 - 22” (559mm) in depth with a minimum width of 18” (457mm) for load ratings up to 125 lbs. (56.7kg)
 - 24” (610mm) in width for load ratings of 125 lbs. (56.7kg) and above
- Slides not manufactured in lengths up to 22” (559mm) will be tested in their longest production length
- Have the material suppliers name or unique brand marking stamped on hinges, slides, and locks for identification purposes

For all other products, the appropriate Declaration Form, declaring that the product has met NAAWS requirements, **MUST BE INCLUDED** with this application. See links to declaration forms below:
